# **HEALTH STATUS PROFILE OF AMERICAN INDIANS IN ARIZONA**

## **1999 DATA Book**

### **TABLE OF CONTENTS**

<b>Introduction .....</b>	<b>1</b>
<b>I. Comparison of American Indians' Standing in Arizona in 1999 With Respect to Selected Health Objectives for the Year 2000 .....</b>	<b>3</b>
<b>1.1 Early Prenatal Care.....</b>	<b>5</b>
<b>1.2 Infant Mortality .....</b>	<b>6</b>
<b>1.3 Postneonatal Mortality .....</b>	<b>7</b>
<b>1.4 Mortality from Unintentional Injuries .....</b>	<b>8</b>
<b>1.5 Mortality from Motor Vehicle-Related Injuries.....</b>	<b>9</b>
<b>1.6 Suicide Mortality.....</b>	<b>10</b>
<b>1.7 Homicide Mortality .....</b>	<b>11</b>
<b>1.8 Mortality of Children 1-14 Years Old.....</b>	<b>12</b>
<b>1.9 Mortality of Adolescents and Young Adults 15-24 Years Old .....</b>	<b>13</b>
<b>1.10 Mortality of Adults 25-64 Years of Age .....</b>	<b>14</b>
<b>II. An Overview of Selected Health Problems and Health Risks Among American Indians and All Residents of Arizona in 1999 .....</b>	<b>15</b>
<b>2.1 Causes From Which American Indians Were More Likely of Less Likely to Die Relative to All Arizona Residents in 1999 .....</b>	<b>17</b>
<b>2.2 Average Age At Death From All Causes Among American Indians and All Arizona Residents .....</b>	<b>18</b>
<b>2.3 Nonmarital Births .....</b>	<b>19</b>
<b>2.4 Low Birthweight Births.....</b>	<b>20</b>
<b>2.5 The Incidence of Fetal Alcohol Syndrome.....</b>	<b>21</b>
<b>2.6 Births to Teenage Mothers.....</b>	<b>22</b>
<b>2.7 Low Birthweight Births to Mothers 30 Years or Older as a Percentage of All Low Birthweight Births....</b>	<b>23</b>
<b>2.8 The Incidence of Pregnancy Associated Hypertension.....</b>	<b>24</b>
<b>2.9 The Incidence of Anemia During Pregnancy .....</b>	<b>25</b>
<b>2.10 The Incidence of Diabetes During Pregnancy .....</b>	<b>26</b>

**III. Characteristics of American Indian Newborns and Mothers Giving Birth  
By Place of Residence in Arizona in 1999.....27****SOCIODEMOGRAPHIC CHARACTERISTICS**

<b>3.1 Maternal Age .....</b>	<b>31</b>
<b>3.2 Educational Attainment of Mother .....</b>	<b>32</b>
<b>3.3 Marital Status of Mother .....</b>	<b>33</b>
<b>3.4 Race/Ethnicity of Father.....</b>	<b>34</b>
<b>3.5 Age of Father.....</b>	<b>35</b>
<b>3.6 Source of Payment for Labor and Delivery.....</b>	<b>36</b>

**MATERNAL LIFESTYLE AND HEALTH CHARACTERISTICS**

<b>3.7 Maternal Weight Gain During Pregnancy .....</b>	<b>39</b>
<b>3.8 Medical Risk Factors for Pregnancy .....</b>	<b>40</b>
<b>3.9 Substance Use During Pregnancy .....</b>	<b>41</b>

**UTILIZATION OF MEDICAL SERVICES**

<b>3.10 Trimester of Pregnancy Prenatal Care Began .....</b>	<b>45</b>
<b>3.11 Number of Prenatal Visits.....</b>	<b>46</b>
<b>3.12 Obstetric Procedures .....</b>	<b>47</b>
<b>3.13 Complications of Labor and Delivery .....</b>	<b>48</b>
<b>3.14 Method of Delivery .....</b>	<b>49</b>
<b>3.15 Attendant at Birth.....</b>	<b>50</b>

**NEWBORN'S HEALTH**

<b>3.16 Gestational Age .....</b>	<b>53</b>
<b>3.17 Weight At Birth.....</b>	<b>54</b>
<b>3.18 Abnormal Conditions of the Newborn .....</b>	<b>55</b>
<b>3.19 Congenital Anomalies (Birth Defects).....</b>	<b>56</b>
<b>3.20 Causes of Infant Death.....</b>	<b>57</b>

#### **IV. Patterns of Mortality Among American Indians By Place of Residence in Arizona in 1999 ..... 59**

##### **AGE-SPECIFIC MORTALITY**

<b>4.1</b>	<b>Age-Specific Mortality .....</b>	<b>63</b>
<b>4.2</b>	<b>Age-Specific Mortality Among Males.....</b>	<b>64</b>
<b>4.3</b>	<b>Age-Specific Mortality Among Females.....</b>	<b>65</b>

##### **CAUSE-SPECIFIC MORTALITY**

<b>4.4</b>	<b>Deaths From Causes Selected As Indicators for Monitoring Progress Toward The Year 2000 Objectives .....</b>	<b>69</b>
<b>4.5</b>	<b>Leading Causes of Death .....</b>	<b>70</b>
<b>4.6</b>	<b>Leading Causes of Death Among Males.....</b>	<b>71</b>
<b>4.7</b>	<b>Leading Causes of Death Among Females.....</b>	<b>72</b>

##### **LEADING CAUSES OF DEATH BY AGE GROUP FOR SELECTED INDIAN NATIONS**

<b>4.8</b>	<b>Leading Causes of Death by Age Group Among Resident of NAVAJO Tribal Communities .....</b>	<b>75</b>
<b>4.9</b>	<b>Leading Causes of Death by Age Group Among Residents of HOPI Tribal Communities.....</b>	<b>76</b>
<b>4.10</b>	<b>Leading Causes of Death by Age Group Among Residents of FORT APACHE Tribal Communities .....</b>	<b>77</b>
<b>4.11</b>	<b>Leading Causes of Death by Age Group Among Residents of GILA RIVER Tribal Communities .....</b>	<b>78</b>
<b>4.12</b>	<b>Leading Causes of Death by Age Group Among Resident of SALT RIVER Tribal Communities .....</b>	<b>79</b>
<b>4.13</b>	<b>Leading Causes of Death by Age Group Among Residents of SAN CARLOS Tribal Communities .....</b>	<b>80</b>
<b>4.14</b>	<b>Leading Causes of Death by Age Group Among Residents of TOHONO O'ODHAM Tribal Communities.....</b>	<b>81</b>
<b>4.15</b>	<b>Leading Causes of Death by Age Group Among American Indians Who Resided Off Reservation in Arizona.....</b>	<b>82</b>

<b>Communities on Indian Reservations in Arizona .....</b>	<b>89</b>

## INTRODUCTION

The report *Health Status Profile of American Indians in Arizona: 1999 Data Book* is the sixth annual update of population-level data on trends and patterns in natality and mortality among American Indian residents of Arizona.

It should be noted that tribal identity is very poorly recorded on birth or death certificates. Tabulations of births and deaths in this publication are by place of residence in Arizona and not by tribe.

American Indian births are determined by mother's race as indicated on a birth certificate, that is, these are the births to American Indian mothers. American Indian deaths are determined by decedent's race as stated on the death certificate.

The charts and tables comprising *Health Status Profile of American Indians in Arizona* are grouped into four major sections:

- 1) a section focused on American Indians' standing in 1999 with respect to selected health objectives for the year 2000;
- 2) a section presenting an overview of selected health problems and health risks among American Indian and all residents of Arizona in 1999;
- 3) a four-part section concerned with the characteristics of American Indian newborns and mothers giving birth who were residents of specified tribal communities on reservations, and those who resided off reservation in Arizona in 1999;
- 4) a three-part section focused on patterns of mortality among American Indians by age group, gender and place of residence in Arizona in 1999. Detailed mortality profiles are given for the seven largest tribal communities: Navajo, Hopi, Fort Apache, Tohono O'Dham, Gila River, Salt River and San Carlos.

These sections are followed by the **Technical Notes** which provide definitions of terms used in the report, as well as information about the sources of data and a detailed classification of communities on Indian reservations in Arizona.

*Health Status Profile of American Indians in Arizona* was intended as a data book: a basic reference for some of the most frequently requested statistics. The four sections of the report were computer-generated and contain information with no accompanying narrative.

**I.**

**COMPARISON OF AMERICAN INDIANS' STANDING  
IN ARIZONA IN 1999 WITH RESPECT TO SELECTED  
HEALTH OBJECTIVES FOR THE YEAR 2000**

## 1.1 Early Prenatal Care

**National Year 2000 Objective: Increase to 90 percent the proportion of women giving birth who receive prenatal care in the first trimester of pregnancy**

## 1.2 Infant Mortality

**National Year 2000 Objective: Reduce the rate of infant deaths among American Indians to no more than 8.5 per 1,000 live births**

## 1.3 Postneonatal Mortality

**National Year 2000 Objective: Reduce postneonatal mortality among American Indians to no more than 4 per 1,000 live births**

## 1.4 Mortality From Unintentional Injuries

**National Year 2000 Objective: Reduce unintentional injury deaths among American Indians to no more than 66.1 per 100,000 (age-adjusted)**

## 1.5 Mortality From Motor Vehicle-Related Injuries

**National Year 2000 Objective: Reduce motor vehicle-related injury deaths among American Indians to no more than 39.2 per 100,000 (age-adjusted)**

## 1.6 Suicide Mortality

**National Year 2000 Objective: Reduce suicides among American Indians to no more than 12.8 per 100,000 (age-adjusted)**

## 1.7 Homicide Mortality

**National Year 2000 Objective: Reduce homicides among American Indians to no more than 11.3 per 100,000 (age-adjusted)**

## 1.8 Mortality of Children 1-14 Years Old

**National Year 2000 Objective: Reduce death rates for children  
1-14 years of age to no more than 28 per 100,000**

**1.9**

## **Mortality of Adolescents and Young Adults 15-24 Years Old**

**National Year 2000 Objective: Reduce death rates for adolescents and young adults 15-24 years of age to no more than 185 per 100,000**

## 1.10 Mortality of Adults 25-64 Years of Age

**National Year 2000 Objective: Reduce death rates for adults  
25-64 years of age to no more than 340 per 100,000**

## **II.**

# **AN OVERVIEW OF SELECTED HEALTH PROBLEMS AND HEALTH RISKS AMONG AMERICAN INDIANS AND ALL RESIDENTS OF ARIZONA IN 1999**

## 2.1

### Causes From Which American Indians Were More Likely (+) or Less Likely (-) to Die Relative to All Arizona Residents in 1999

*PERCENTAGE DIFFERENCE IN AGE-ADJUSTED MORTALITY RATES FOR 1999*

\*Excluding HIV infection

## 2.2

### **Average Age At Death From All Causes Among American Indians and All Arizona Residents**

## **2.3 Nonmarital Births**

## 2.4 Low-Birthweight Births

## 2.5 The Incidence of Fetal Alcohol Syndrome

\*19 or younger

**2.7**  
**Low-Birthweight Births to Mothers 30 Years or Older  
as a Percentage of All Low-Birthweight Births**

Source: *Tables 1B-3 and 1B-15 in Arizona Health Status and Vital Statistics 1998*

## 2.8 The Incidence of Pregnancy Associated Hypertension

**2.9**

## **The Incidence of Anemia During Pregnancy**

## 2.10 The Incidence of Diabetes During Pregnancy

### **III.**

## **CHARACTERISTICS OF AMERICAN INDIAN NEWBORNS AND MOTHERS GIVING BIRTH BY PLACE OF RESIDENCE IN ARIZONA IN 1999**

**Note: The data in Tables 3.1 – 3.19 are by self-reported (and not validated) place of mother's residence.  
Certain tribal communities may not be present (or, may be underrepresented) in the tabulated data.**

## SOCIODEMOGRAPHIC CHARACTERISTICS

**3.1**  
**MATERNAL AGE (1999 STATUS)**

## TECHNICAL NOTES

# Sources of Data

The charts in Sections I and II are based on rates and ratios published in the ***Arizona Health Status and Vital Statistics*** annual report.

Information on live births and deaths in Sections III and IV is compiled from the original documents filed with the Arizona Department of Health Services', Office of Vital Records and from transcripts of original certificates filed in other states but affecting Arizona residents. (Copies of certificates for births and deaths occurring to Arizona residents outside the United States are not sent to Arizona).

Population denominators for American Indians by place of residence in Arizona were not available for 1999.

## Definitions

### Rates

Rate is a measure of the frequency of some event in relation to a unit of population during a specified time period such as a year; events in the numerator of the year occur to individuals in the denominator. Rates express the likelihood (or risk) of the event in the specified population during a particular time and are generally expressed as units of population in the denominator (per 1,000, per 100,000 and so forth).

### Terms Related to Reproductive Health\*

***Birth or Live Birth*** - The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

\*See "Standard Terminology for Reporting Reproductive Health in the United States". Public Health Reports, Vol.103, No.5. September-October 1988.

***Birth weight*** - The weight of a neonate determined immediately after delivery or as soon thereafter as possible.

***Infant death*** - Any death at any time from birth up to, but not including, the first year of age (364 days, 23 hours, 59 minutes from the moment of birth).

***Infant mortality rate*** - Number of infant deaths per 1,000 live births.

***Low-birthweight*** - Prior to 1990: any neonate whose weight at birth is 2,500 grams or less. Beginning in 1990: any neonate weighing less than 2,500 grams at birth (less than 5 pounds 8 ounces).

***Neonatal death*** - Death of a liveborn neonate before the neonate becomes 28 days old (up to and including 27 days, 23 hours, 59 minutes from the moment of birth).

***Neonatal mortality rate*** - Number of neonatal deaths per 1,000 live births.

***Postneonatal death*** - Any death of a liveborn infant at least 28 days of age but less than one year of age.

***Postneonatal mortality rate*** - Number of postneonatal deaths per 1,000 live births.

***Very Low-Birthweight*** - Any neonate whose weight at birth is 1,500 grams or less (less than 3 pounds 5 ounces).

## Terms Related to Mortality

***Age-adjusted mortality rates*** - Because mortality from most causes of death occurs predominately among the elderly, a population group with a larger proportion of older persons would have a higher mortality rate. The "age-adjustment" removes the effect of the age differences among sub-populations by placing them all in a population with a standard age distribution. All age-adjusted mortality rates in this report were computed by the direct method, that is by applying the age-specific death rates to the standard population distributed by age. The total U.S. population as enumerated in 1940 was used as the standard. The age-adjusted mortality rates in this report are based on the following nine age groups:

<b>Age</b>	<b>Population per million</b>
All ages	1,000,000
Under 1 year	15,343
1-4 years	64,718
5-14 years	170,335
15-24 years	181,677
25-34 years	162,066
35-44 years	139,237
45-54 years	117,811
55-64 years	80,294
65 years and over	68,499

**Age-specific mortality** - Number of deaths in a specific age group during a calendar year.

**Cause of death** - For the purpose of national mortality statistics, every death is attributed to one underlying condition, based on information reported on the death certificate and utilizing the international rules for selecting the underlying cause of death from the reported conditions.

**Cause-specific mortality** - Number of deaths from a specified cause during a calendar year.

**Classification of causes of death** - The cause of death used in this report is the underlying cause classified according to the *International Classification of Diseases, Injuries and Causes of Death*. Listed below are categories and International Classification of Diseases (ICD) codes for selected causes of mortality presented in this report.

**Alcoholism:** 291, 303, 571.0-571.3

**Alzheimer's Disease:** 331.0

**Breast Cancer in women:** 174

**Cerebrovascular Disease (Stroke):** 430-438

**Chronic Obstructive Pulmonary Disease (COPD):** 490-496

**Cirrhosis:** 571

**Diabetes Mellitus:** 250

**Diseases of Heart:** 390-398, 402, 404-429

**Drowning:** 830, 832, 910

**HIV Infection:** 042-044

**Homicide and legal intervention:** 960-978

**Infectious and parasitic diseases:** 001-139

**Injuries Not Related to Motor Vehicles:** 800-807, 826-949

**Injuries, Unintentional:** 800-949

**Lung Cancer:** 162.2-162.9  
**Malignant Neoplasms (cancers):** 140-208  
**Motor Vehicle-Related Injuries:** 810-825  
**Pneumonia and Influenza:** 480-487  
**Septicemia:** 038  
**Suicide:** 950-959

## Medical Terms Used on the Birth Certificate

### Medical risk factors for this pregnancy

**Anemia** - Hemoglobin level of less than 10.0 g/dL during pregnancy, or hematocrit of less than 30 percent during pregnancy.

**Cardiac disease** - Disease of the heart.

**Acute or chronic lung disease** - Disease of the lungs during pregnancy.

**Diabetes** - Metabolic disorder characterized by excessive discharge of urine and persistent thirst; includes juvenile onset, adult onset and gestational diabetes during pregnancy.

**Genital herpes** - Infection of the skin of the genital area by herpes simplex virus.

**Hydramnios/Oligohydramnios** - Any noticeable excess (hydramnios) or lack (oligohydramnios) of amniotic fluid.

**Hemoglobinopathy** - A blood disorder caused by alteration in the genetically determined molecular structure of hemoglobin (for example, sickle cell anemia).

**Hypertension, chronic** - Blood pressure persistently greater than 140/90, diagnosed prior to onset of pregnancy or before the 20th week of gestation.

**Hypertension, pregnancy-associated** - An increase in blood pressure of at least 30 mm hg systolic or 15 mm hg diastolic on two measurements taken 6 hours apart after the 20th week of gestation.

**Eclampsia** - The occurrence of convulsions and/or coma unrelated to other cerebral conditions in women with signs and symptoms of preeclampsia.

**Incompetent cervix** - Characterized by painless dilation of the cervix in the second trimester or early in the third trimester of pregnancy, with premature expulsion of membranes through cervix and ballooning of the membranes into vagina, followed by rupture of the membrane and subsequent expulsion of the fetus.

**Previous infant 4,000+ grams** - The birthweight of a previous live-born child was over 4,000 grams (8lbs.14oz.).

**Previous preterm or small-for-gestational-age-infant** - Previous birth of an infant prior to term (before 37 completed weeks of gestation) or of an infant weighing less than the 10th percentile for gestational age using a standard weight for age chart.

**Renal disease** - Kidney disease.

**Rh Sensitization** - The process or state of becoming sensitized to the Rh factor as when an Rh-negative woman is pregnant with an Rh-positive fetus.

**Uterine bleeding** - Any clinically significant bleeding during the pregnancy taking into consideration the stage of pregnancy; any second or third trimester bleeding or third trimester bleeding of the uterus prior to the onset of labor.

### Complications of labor and/or delivery

**Febrile** - A fever greater than 100 degrees F. or 38 degrees C. occurring during labor and/or delivery.

**Meconium, moderate/heavy** - Meconium consists of undigested debris from swallowed amniotic fluid, various products of secretion and shedding by the gastrointestinal tract, moderate to heavy amounts of meconium in the amniotic fluid noted during labor and/or delivery.

**Premature rupture of membranes (more than 12 hours)** - Rupture of membranes at any time during pregnancy and more than 12 hours before the onset of labor.

**Abruption placenta** - Premature separation of normally implanted placenta from the uterus.

**Placenta previa** - Implantation of the placenta over or near the internal opening of the cervix.

**Other excessive bleeding** - The loss of significant amount of blood from conditions other than abruptio placenta or placenta previa.

**Seizures during labor** - Maternal seizures occurring during labor from any cause.

**Precipitous labor** (less than 3 hours) - Extremely rapid labor and delivery lasting less than 3 hours.

**Prolonged labor** (more than 20 hours) -

Abnormally slow progress of labor lasting more than 20 hours.

**Dysfunctional labor** - Failure to progress in a normal pattern of labor.

**Breech/Malpresentation** - At birth, the presentation of the fetal buttocks, rather than the head or other malpresentation.

**Cephalopelvic disproportion** - The relationship of the size, presentation and position of the fetal head to the maternal pelvis, which prevents dilation of the cervix and/or descent of the fetal head.

**Cord prolapse** - Premature expulsion of the umbilical cord in labor before the fetus is delivered.

**Anesthetic complications** - Any complication during labor and/or delivery brought on by an anesthetic agent or agents.

**Fetal distress** - Signs indicating fetal hypoxia (deficiency in amount of oxygen reaching fetal tissues).

### Abnormal conditions of the newborn

**Anemia** - Hemoglobin level of less than 13.0 g/dL, or a hematocrit of less than 39 percent.

**Birth injury** - Impairment of the infant's body function or structure due to adverse influences that occurred at birth.

**Fetal alcohol syndrome** - A syndrome of altered prenatal growth and development occurring in infants born of women who consumed excessive amounts of alcohol during pregnancy.

**Hyaline membrane disease/RDS** - A disorder primarily of prematurity, manifested clinically by respiratory distress and pathologically by pulmonary hyaline membranes and incomplete expansion of the lungs at birth.

**Meconium aspiration syndrome** - Aspiration of meconium by the fetus or newborn, affecting the lower respiratory system.

**Assisted ventilation (less than 30 minutes)** - A mechanical method of assisting respiration for newborns with respiratory failure.

**Assisted ventilation (30 minutes or more)** - Newborn placed on assisted ventilation for 30 minutes or longer.

**Seizures** - A seizure of any etiology.
